Richard King
Moneycorp, Head
of Development

“

Prism has been of great value to me over the years. They have found me good candidates that match the roles I have given them. They have delivered candidates quickly along with maintaining high-quality options for me to choose from. Prism is a trusted partner to me as they understand and can adapt to Moneycorp's ecosystem and the frequent changes that we encounter in our fast-paced financial services environment. Thank you for all the support over the years.

”

Working with Prism Digital has been brilliant for my team at Moneycorp. From day one of the brief, they're highly proactive, delivering top-tier candidates often faster than I can provide feedback. They truly understand my needs, consistently delivering a shortlist of high-quality candidates. Final hiring decisions are often challenging for me when selecting candidates from Prism, as they typically provide multiple strong options that are all suitable for the job.

I have used Prism to hire both contract and permanent roles and they have a 100% delivery success rate. Their day rates for contractors are not only transparent but also competitive, which is rare to find in a recruitment partner. Prism's commitment is clear, not only in how they handle each role but also in their back-office support, with invoicing that's accurate and always on time. It's one less thing I need to worry about, and I can focus on other priorities knowing that Prism has every detail covered.

They're truly dedicated to my team's success, and it's a pleasure working with a partner who values having a successful relationship.

Peter Methven
Moneycorp, Head
of IT SecOps
